Title: Mrs.

Organization: none

County: Onondaga

Comment: The Energy Plan must have a clearly defined plan and implementation schedule to meet increased energy efficiency, renewable energy development, and greenhouse gas emission reduction goals. The plan must not support new dirty coal plants, expensive nuclear power or air, soil and water polluting hydrofracking gas well drilling. Such drilling must be banned. Government must help prevent pollution. This is a huge public health threat. Thank you for consideration of my comments.
